ISSB / IFRS S1+S2 Adoption (Nepal NSRS)

Prepared by Jana Earth Data · Last updated 2026-06-01

A simplified view of how the global **ISSB** sustainability standards (**IFRS S1** and **IFRS S2**) are being adopted across the jurisdictions most relevant to Jana's work, including **Nepal's NSRS** in the South Asia cluster, the **UK** endorsement track, the parallel **EU** regime, and other **Asia-Pacific** adoptions.

For context: ISSB was set up by the IFRS Foundation in 2021 and issued IFRS S1 (general sustainability disclosure) and IFRS S2 (climate-specific disclosure) in June 2023, building on the TCFD framework. IOSCO endorsed both standards as the global baseline in July 2023.

Adoption by Region

Reading Notes

Acronym key

Acronym	Full Name
AASB	Australian Accounting Standards Board
ASB	Accounting Standards Board (under ICAN, Nepal)
BRSR	Business Responsibility and Sustainability Reporting (India)
CSRD	Corporate Sustainability Reporting Directive (EU)
EFRAG	European Financial Reporting Advisory Group
ESRS	European Sustainability Reporting Standards (developed by EFRAG)
FCA	Financial Conduct Authority (UK)
HKEX	Hong Kong Exchanges and Clearing
ICAB	Institute of Chartered Accountants of Bangladesh
ICAN	Institute of Chartered Accountants of Nepal
ICAP	Institute of Chartered Accountants of Pakistan
IFRS	International Financial Reporting Standards
ISSB	International Sustainability Standards Board (under IFRS Foundation)
NRB	Nepal Rastra Bank (Nepal central bank)
NSRS	Nepalese Sustainability Reporting Standards
SDR	Sustainability Disclosure Requirements (UK)
SEBI	Securities and Exchange Board of India
SGX	Singapore Exchange
SLFRS	Sri Lanka Financial Reporting Standards
SSBJ	Sustainability Standards Board of Japan

Acronym	Full Name
UK SRS	UK Sustainability Reporting Standards

Two patterns of adoption

Direct adoption. A national accounting standards body issues a local version of IFRS S1 and S2, typically with the same name structure (AASB S1 / S2 in Australia, SLFRS S1 / S2 in Sri Lanka, NSRS in Nepal). This is the standard pathway: ISSB issues at the international level, the local body endorses and adopts, the standards become mandatory through the local regulatory framework.

Interoperable parallel regime. The EU's CSRD uses the European Sustainability Reporting Standards (ESRS), developed by EFRAG independently of ISSB. ESRS uses a "double materiality" framework (financial impact and impact on people / planet) where IFRS S1 / S2 use single materiality. ISSB and EFRAG published an interoperability guide in September 2024 to help firms reporting under both.

Sources and caveats

This is a simplified view as of mid-2026. Specifics on effective dates, phase-in schedules, and mandatory-vs-voluntary status can shift — verify with the jurisdiction's accounting standards body or securities regulator before citing for official purposes. The [IFRS Foundation jurisdictional profile page](#) tracks current ISSB adoption status.

General regulatory reference.
